

Program Outcomes (POs)

PO 1: Knowledge Application

Graduates will be able to apply foundational and advanced knowledge of pharmaceutical sciences to solve complex problems in the pharmaceutical industry and healthcare system

PO 2: Technical Proficiency

Graduates will be able to demonstrate proficiency in pharmaceutical techniques and practices, including drug discovery, drug product development, pharmaceutical product manufacturing, quality control, quality assurance, regulatory approvals, sales and marketing, clinical data management, pharmacovigilance, clinical and hospital pharmacy, etc.

PO 3: Research and Innovation

Graduates will be able to do independent research, showcasing their ability to design and conduct experiments, analyse and interpret the data, and contribute to the advancement of pharmaceutical knowledge

PO 4: Professionalism and Ethics

Graduates will be able to exhibit professionalism and adherence to ethical standards in all aspects of pharmacy practice, including decision-making and interactions with patients, colleagues, and healthcare team members

PO 5: Lifelong Learning

Graduates will be able to demonstrate a commitment to lifelong learning and self-improvement, utilizing various resources to stay updated on advancements in pharmaceutical sciences

PO 6: Leadership and Teamwork

Graduates will be able to exhibit effective leadership and teamwork skills, working collaboratively within diverse teams to achieve organisation goals, address healthcare challenges, and improve medication outcomes

PO 7: Patient-Centered Care

Graduates will be able to provide patient-centred care by effectively communicating medication information, drug-drug and drug-food interactions, by counselling patients, and by collaborating with healthcare teams to optimize therapeutic outcomes

PO 8: Community Engagement

Graduates will be able to actively participate in community service and health promotion activities, demonstrating an understanding of the social determinants of health and their impact on public health
